A World Leader in Defense and Commercial Marine Systems

Since 1946, Jered has been designing, manufacturing, maintaining and refurbishing a wide range of equipment for various government and commercial customers. Jered began as a general engineering design firm, but as the company grew and progressed, a major portion of the projects undertaken were in the marine field, particularly with the U.S. Navy. In 1964, Jered purchased the marine deck machinery lines of the American Engineering Company (AEC) and the C.H. Wheeler Company (CHWC). These organizations had designed and manufactured steering gear, deck cranes and deck machinery for the Navy for over 80 years. Numerous key AEC and CHWC personnel transferred over to Jered with the acquisitions and these professionals provided the experience and knowledge necessary to complement and strengthen Jered's overall position in the marine machinery field. These acquisitions directly led Jered to become one of the leading designers and manufacturers of steering gear systems for today's U.S. Navy.

Building on this experience, during the 1970s Jered became a major source of naval machinery products including deck cranes, weapons and cargo elevators, steering gear, anchor windlasses, deck edge aircraft elevators and special material handling systems. It was during this period that the Jered Deck Edge Aircraft Elevator became the U.S. Navy standard and we continue to work very hard to ensure that Jered maintains this distinction in present day. Following the combination with PaR Systems and Ederer in 2005 the company has a greatly enhanced capability to rapidly develop new designs to confidently meet the latest requirements using an even deeper and broader level of expertise.

Jered LLC Locations:

- Brunswick, GA (Program Management, Engineering, Manufacturing, Quality Assurance)
- Iron Mountain, MI (Engineering)
- Shoreview, MN* (Engineering, Quality Assurance)
- Seattle, WA* (Engineering, Quality Assurance)

* denotes shared corporate resources

Jered LLC – Fact Sheet/Page 2

Jered Engineering Capabilities

- Structural Engineering
- Hydraulic Engineering
- Machinery Design Engineering
- Naval Architecture
- Systems Engineering
- Advanced Automation
- Electrical Engineering

Jered Engineering Specialties

- Aircraft Elevators, Cargo/Weapons Elevators
- Naval Ship Equipment - steering, anchor, cranes, boat handling systems
- Lighter Module & System Design (ELCAS(M))
- Integrated Logistic Support
- Automated Handling Systems
- Technical Manuals
- Well documented designs, meeting the customer's requirements
- Designs detailed for manufacture

Current U.S. Navy Programs with Jered Products

- CVN-21 Class Nuclear Aircraft Carriers
- LPD San Antonio Class Amphibious Transport Dock
- DDG-51 Arleigh Burke Class Guided Missile Destroyer
- DDG-1000 Zumwalt Class Destroyer
- LHA-6 America Class Amphibious Assault Ship
- LCS-1 Lockheed Martin Littoral Combat Ship
- LCS-2 General Dynamics Littoral Combat Ship
- LHD Wasp Class Amphibious Assault Ship
