

- Supplemental Mechanical and Software Engineering support
- Small project engineering design and build
- Lab and process development equipment

OAKRIVER
TECHNOLOGY

Small Projects

Precision Ultrasonic Spray Head

- Process development spray head
- Atomizes a fluid for deposition onto a medical device
- Upgrade module for a medical device spray coater

OAKRIVER
TECHNOLOGY

Test Equipment

Electrical Test Racks for Medical Device Testing

- RF, hipot, and other electrical test systems
- Test fixture development and wiring design
- System configuration, assembly and checkout

Large Scale Thin Film Metrology Tool

- Wafer process monitoring tool using XPS technology
- Turnkey contract manufacturing services
- Spare parts fulfillment and reconditioning services

Small Scale Optical Film Dispensers

- Supported the product commercialization
- Prototyping and design for manufacturability
- Manufacturing scale-up

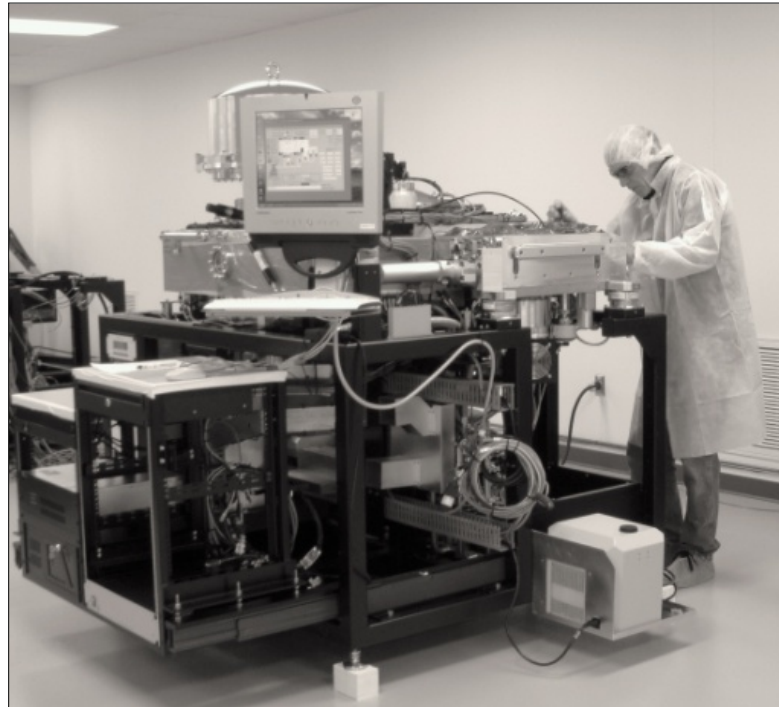

OAKRIVER
TECHNOLOGY

Subsystem

Semiconductor Chiller Drawer

- Management of RoHS & UL compliance
- BOM & component obsolescence management
- Subsystem functional testing

- Class 10,000 clean room for general manufacturing
- Class 100 hoods for stricter cleanliness requirements
